

## **NOVINIUM MOVES INTO TWO NEW FACILITIES TO SUPPORT GROWTH**

Novinium, the global leader in cable rejuvenation technology, has moved into two new facilities to accommodate its rapid growth and its substantial commitment to research and development. Our headquarters in Kent, Washington provides office and laboratory facilities for our Corporate Operations and Engineering Group, and an operating base for our Field Operations. The laboratory in the Kent facility provides testing of mechanical and electrical components integral to our Novinium® high performance injection process. The second facility is a state-of-the-art chemical and electrical testing laboratory located in Midland, Michigan. In the Midland lab the chemistry and physics of new materials are explored for efficacy and long-term performance as Novinium continues to push the cable life-extension performance envelope. Please make a note of the new addresses and phone numbers.

### **Headquarters**

Novinium, Inc.  
22019 70<sup>th</sup> Avenue South  
Kent, WA 98032

phone 206.529.4828  
fax 206.774.9754
