Re: Use of Novinium Injection Elbows with Elastimold 200A Elbow Connectors

To Whom It May Concern,

Thomas and Betts (T&B) is aware that Novinium engaged NEETRAC to perform ANSI C119.4 tests on Novinium injection adaptors (IAs). NEETRAC reported that all adaptors tested met the thermal, electrical, and mechanical acceptance criteria of the standard. T&B has reviewed the NEETRAC test report and agrees with the execution of the tests as well as the conclusions made to the results of the tests.

When installed per Novinium supplied instructions, and in conjunction with T&B installation practices, T&B is not aware of any performance problems with the combination of properly assembled Novinium IAs in Elastimold medium voltage elbows.

T&B makes no warranties, expressed or implied, regarding the performance of Novinium technology when used in combination with T&B medium voltage elbows or other related components.
